DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, 50-61, drawn to a method of applying a composition/making an applicator tip, classified in class 424, subclass 78.06.
 - II. Claims 26-49, 62-75, drawn to a method of making an applicator, classified in class 604, subclass 1.
 - III. Claims 76-102, 120-124, 135-143, drawn to an applicator, classified in class 604, subclass 1.
 - IV. Claims 103-119, drawn to a method of making a medical adhesive composition, classified in class 604, subclass 310.
 - V. Claims 125-134, 144, drawn to a kit, classified in class 604, subclass 310.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus wherein the adhesives are applied in monomeric form to the surfaces to be joined.

3. Inventions I and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus wherein the adhesives are applied in monomeric form to the surfaces to be joined.

4. Inventions I and IV or II and IV or III and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as application of a flavorant as stated in the instant specification.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1615

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
